

WEBSITE BLUEPRINT

SME IPO Advisory Website Structure & Layout Recommendation

Competitor layout review, recommended sitemap, section-by-section wireframes and the Eligibility Checker specification — built to convert paid traffic from the lead generation plan into readiness calls.

Prepared for: SME IPO Advisory (client) · **Prepared by:** Aditya Kumar, Founder & CEO, WebSpider Solutions · **Date:** 21 September 2026

WebSpider Solutions · Delhi NCR · info@webspidersolutions.com · webspidersolutions.com
Confidential — prepared exclusively for the addressee.

1. How competitors lay out their sites

We captured the live pages of the six firms most visible for SME IPO advisory searches (screenshots taken 21 Sep 2026, desktop). Below is what each does and what we take or avoid.

Maxout Global

Wall of keyword-stuffed text above the fold, tiny hero, no clear CTA, city lists everywhere. Built purely for search engines.

Take: city-level pages do rank — we'll build them, but as clean landing pages. **Avoid:** text walls, no visual hierarchy, no lead capture in the first screen.

SME IPO Consultants (smeipoconsultants.com)

Clean split hero ("End-to-End SME IPO Advisory for NSE Emerge & BSE SME") with two CTAs — "Book your IPO Readiness Consultation" and "Get SME IPO Eligibility Assessment". Green accent, benefits grid below.

Take: the two-CTA hero (consultation + eligibility) is exactly the right model; benefit icons section works. **Avoid:** stock-photo people, no proof numbers, no process timeline, no tools.

India IPO (indiaipo.in)

Dark cinematic hero (bull image), "Go Public, The Right Way", floating "Check IPO Eligibility" CTA, stats strip (8,200+ clients, 25+ years), service cards, "Why choose" section, WhatsApp float.

Take: stats strip, sticky eligibility CTA, WhatsApp float, service cards with icons. **Avoid:** generic stock imagery, mixing SME and mainboard messaging, no timeline.

Mistry Mehta (CA firm)

Corporate blue template, meeting-room photo, long text intro, plain link list of services, contact form in the footer.

Take: credibility language ("SEBI-registered merchant banker partners", cities served).

Avoid: no CTA in hero, no visual process, feels like a firm brochure not a lead page.

Compliance Calendar

Article-style page with sticky left table of contents (Overview, Platforms, Compliance, Documents, Coordination, Timeline, Post-listing), a quote-request form top-right, 25+ FAQs.

Take: the sticky in-page navigation and deep FAQ block — great for SEO and for AI answers (GEO/AEO). **Avoid:** it's a guide, not a sales page; form is buried.

NDS Avlaa

Dark navy hero, "SME IPO Advisory — Listing on BSE SME and NSE Emerge", "What is an SME IPO" explainer, "Who should consider" cards (profitable growth companies, family businesses, etc.), step-by-step process.

Take: "Who should consider the SME IPO route" cards — this is self-qualification, which we'll turn into the interactive checker. **Avoid:** too much explanation before any ask.

Summary of the gap: nobody combines (1) a two-CTA hero with an eligibility tool, (2) proof numbers, (3) a visual 17-week timeline, (4) a sticky in-page nav + FAQ for search/AI visibility, and (5) instant WhatsApp contact. Our site does all five, and looks like an advisory firm — not a CA blog and not an SEO farm.

2. Recommended sitemap

Plus legal pages (privacy, terms, disclaimer — the disclaimer matters for financial-services ad verification) and a thank-you page for conversion tracking.

3. Homepage — section by section

[Eligibility](#) · [Cost & Timeline](#) · [Services](#) · [NSE vs BSE](#) · [Why Us](#) · [Resources](#)

[Book a Call](#)

1 · HERO

List your company on NSE
Emerge / BSE SME in ~17 weeks
One advisor. Every intermediary coordinated. From readiness check to listing day.
[Check eligibility in 60 sec](#)
[Book a readiness call](#)
✓ Free assessment ✓ No obligation ✓
Reply within 15 min

Visual

Animated 10-step timeline graphic (from the deck), not stock photo

2 · PROOF STRIP
[X] mandates advised · ₹[X] Cr raised · 17-week avg timeline · [X] intermediary partners

3 · WHO IT'S FOR

Is your company ready?
3 cards: ₹70–250 Cr revenue · Profitable 2 of 3 yrs · 3+ yrs operating →
"See if you qualify"

4 · PROCESS

The 17-week roadmap
Horizontal 10-step timeline with weeks & intermediaries (interactive on hover)

5 · SERVICES
3 cards: Pre-IPO readiness · IPO execution · Post-listing support

6 · WHY US
Single advisor vs juggling 8 intermediaries — comparison table

7 · COST
"What does an SME IPO cost?" teaser → cost page

8 · TESTIMONIALS
Promoter quotes / logos (or founder video if no clients yet)

9 · FAQ
8 questions with schema markup

10 · FINAL CTA

Ready to discuss your IPO readiness?
[Check eligibility](#) [WhatsApp us](#)

FOOTER
Links · address · disclaimer · SEBI/exchange references (as permitted)

Why this order

- **Hero** makes the ask immediately — every paid click lands with an eligibility CTA visible without scrolling, on mobile too.
- **Proof strip** answers "can I trust you?" before the visitor reads anything else. If real numbers aren't available yet, use "advisor with X years / partners with SEBI-registered merchant bankers".
- **Who it's for** filters out unqualified traffic early — saves your team's time on calls.
- **Process** turns the deck's timeline into the site's signature visual. No competitor shows this well.
- **Why us** is the positioning: one quarterback vs eight vendors.
- **FAQ** with FAQ schema gets us into Google's "People also ask" and AI answers.
- **Final CTA** repeats the hero ask for people who scrolled everything.

Always-on elements

- Sticky top bar with "Book a Call" button; on mobile a bottom bar with Call · WhatsApp · Check Eligibility
- WhatsApp floating button (bottom-right) with pre-filled message
- Callback widget: "Leave your number, we call in 15 minutes"
- Exit-intent popup on paid traffic only: "Download the SME IPO Readiness Scorecard"

Look and feel

- Palette: deep navy + white with a single accent (gold or teal) — advisory, not fintech-flashy
- Typography: a serif for headlines (trust), clean sans for body
- No stock "handshake" photos — use the timeline graphic, exchange/skyline line-art, and the founder's real photo
- Fast: under 2s load, images in WebP, no heavy sliders

4. Eligibility Checker — the lead magnet

A 5-step, one-question-per-screen form. It feels like a tool, not a contact form, so completion rates are 3–4× higher. Contact details are asked last, after the visitor is invested.

STEP 1
What was your revenue last financial year?
☐ Below ₹25 Cr ☐ ₹25–70 Cr ☐ ₹70–150 Cr ☐ ₹150–250 Cr ☐ Above ₹250 Cr

STEP 2
Profitable in how many of the last 3 years?
☐ 0 ☐ 1 ☐ 2 ☐ 3

STEP 3
Net worth & years in operation
☐ Positive net worth ✓/X ☐ <3 yrs ☐ 3+ yrs

STEP 4
Why are you considering an IPO?
☐ Growth capital ☐ Debt reduction ☐ Brand / credibility ☐ Exit for investors
☐ Exploring

STEP 5
Where should we send your result?
 Name · Company · City · Mobile/WhatsApp · Email (optional)
[Show my result](#)

RESULT
"You appear IPO-ready" / "You may qualify in 12–18 months"
 Score bar + 3 next steps + [Book a 20-min readiness call](#) + WhatsApp button

Logic

- **Ready:** revenue ₹70 Cr+, profitable 2+ of 3 years, positive net worth, 3+ years → hot lead, call within 15 minutes
- **Nearly ready:** one criterion short → warm lead, nurture sequence + call within 24 hours
- **Not yet:** below thresholds → resource download, monthly newsletter, no sales call
- Revenue band and result are pushed to the CRM as fields, so your team sees the score before dialling

Why it converts

- Promoters want to know "am I eligible?" — this answers it in 60 seconds
- Each answer is a micro-commitment; by step 5 sharing a number feels natural
- The result page books the call immediately while intent is highest
- Under-₹70 Cr companies self-filter out, keeping your call list clean

Tracking

- Each step fires a GA4 event — we see where people drop
- "Ready" results fire the Google Ads and Meta conversion; "Not yet" results don't, so the algorithms optimise toward qualified promoters only

5. Inner page layouts

Page	Layout & key sections
Cost & Timeline	Hero with "What does an SME IPO cost?" → cost table by intermediary (merchant banker, RTA, legal, auditor, exchange fees, marketing) with ranges → the 17-week timeline in detail → "Get an exact estimate" CTA → FAQ
Services	Three sections mirroring the deck: Pre-IPO (readiness, structuring, equity story), Execution (intermediaries, DRHP, approvals, roadshows), Post-listing (market making, IR, compliance) — each with deliverables list and CTA
NSE Emerge vs BSE SME	Side-by-side comparison table (eligibility, fees, liquidity, migration to mainboard), "which is right for you" decision block, CTA to checker
Why Us	Founder story + photo, intermediary network logos, "one advisor vs eight vendors" graphic, mandates/experience, how we work
Resources	Guide-style articles with sticky table of contents (the Compliance Calendar pattern), author box, related guides, in-article CTA banners every ~600 words
City pages	Same template: "SME IPO Consultant in [City]" hero, local sector focus (e.g. Surat textiles, Pune auto), companies listed from that city, checker embed, local contact
Book a Call	Calendar embed left, "what happens on the call" + founder photo right, WhatsApp alternative

6. Copy direction (hero options to test)

#	Headline	Sub-line
A	List your company on NSE Emerge or BSE SME in ~17 weeks	One advisor coordinates every intermediary — from readiness check to listing day.
B	Is your company SME IPO-ready?	Find out in 60 seconds. Free eligibility check, no obligation.
C	Raise growth capital without handing control to private equity	An SME listing lets you raise ₹10–50 Cr while you keep running the company.

We launch with A on the homepage, B on the eligibility landing page for search ads, C on Meta/LinkedIn landing pages. After 4 weeks the best performer becomes the default.

7. Technical build

Stack

- WordPress + lightweight theme (or Next.js if the client prefers) on managed hosting with CDN
- Eligibility Checker as a custom multi-step form (Fluent Forms / custom JS) with conditional logic and CRM webhook
- Zoho CRM / HubSpot free tier; WhatsApp Business API auto-reply via Interakt or AiSensy
- Calendar booking via Calendly / Zoho Bookings embed

Tracking

- GA4 + Google Tag Manager, Google Ads conversion (checker "Ready" result, call booked, WhatsApp click, call button)
- Meta Pixel + Conversions API, LinkedIn Insight Tag
- Call tracking number on paid landing pages

SEO / AEO built in

- Schema: Organization, ProfessionalService, FAQPage, Article, BreadcrumbList
- Sticky table of contents on all guides; question-style H2s for AI answer engines
- Core Web Vitals green; WebP images; no sliders
- Disclaimer + privacy page wording aligned to Google financial-services ad policy

Timeline

- Week 1: content inputs, brand assets, wireframe sign-off, copy draft
- Week 2: design + build, checker logic, CRM/WhatsApp connections
- Week 3: content upload, tracking QA, mobile QA, go-live

What we need from you to start the build: brand name + logo (or we create one), founder photo and 4–5 line bio, any mandate numbers or client names we can show, intermediary partner names, preferred domain, and confirmation of the ₹70–250 Cr revenue band as the qualifying threshold in the checker.

Next step

Approve this blueprint (or mark changes) and we start Week 1 immediately. A 20-minute call to walk through the wireframes works best.
